

自动铺布机与传统生产对比

AUTOMATIC FABRIC SPREADING MACHINES VERSUS CONVENTIONAL PRODUCTION

提高生产效率，机械能够长期高速地运作，出产效率高且质量稳定。若以每天工作8小时计算，一台铺布机双拉模式下每天大约铺1万平米的面料，相当于4-6个人工铺布效率。

Improving production efficiency, the machine can operate at high speed for a long time, with high production efficiency and stable quality. If we calculate by working 8 hours per day, one fabric laying machine in double pulling mode can lay about 10,000 meters of fabric per day, which is equivalent to 4-6 manual fabric laying efficiency.

根据工厂铺布需求有多种铺布方式可选

VARIOUS SPREADING METHODS ARE AVAILABLE ACCORDING TO FACTORY SPREADING REQUIREMENTS

普通单拉 One way	带前压单拉 One way with front pressuring device	普通双拉 Face to face
配置普通切刀 Equipped standard knife cutting device	配置前压和带压切刀 Equipped front pressuring & pressurized cutting device	配置切刀或折布器 Equipped cutting device or folding device
适用于普通针织面料单拉 Suitable for knitted fabrics woven fabrics, one way	适用于普通针织、复合及其它面料单拉 Suitable for knitted fabrics woven fabrics, composited fabrics etc.	适用于普通针织面料双拉 Suitable for Knitted fabrics, face to face
带前后压双拉 with front & back pressuring device, face to face	双拉双切 Automatic cutting & face to face	阶梯铺布 Stepped fabrics spreading
配置前后压和折布器 Equipped front & back pressuring device, face to face	配置双切切刀 Equipped Automatic cutting device for zigzag spreading	配置普通切刀 Equipped standard knife cutting device
适用于普通针织、复合及其它面料的双拉 Suitable for knitted fabrics woven fabrics, composited fabrics etc.	适用于来回铺展布料并在端点切断布料 Suitable for zigzag spreading fabrics, and can cut the peak of fabrics	适用于工厂同床铺不同版长 Suitable for multiple length spreading on same table

机器参数	SL2405D-160-63	SL2405D-190-74	SL2405D-210-82
铺布宽度	160cm	190cm	210cm
单拉高度		20cm	
双拉高度		20cm	
铺布速度		0-80/min(可调)	
布料重量		80kg (max)	
布料直径		50cm(max)	

SU LEE SL2405D SERIES

INTELLIGENT AUTOMATIC SPREADING MACHINE

本机适用于各种针织、弹力面料、牛奶丝、泳装、内衣裤、摇粒绒、雨衣、纤维.....等面料。
It is suitable for various types of fabric, as like knitted fabrics, woven fabrics, stretch fabrics, milk silk, swimwear, underwear, fleece, raincoat and fiber etc.
